Project Flow :

- A web Application is built where;
    - Farmers can interact with the portal build
    - Interacts with the user interface to upload images of diseased leaf
    - Our model built analyses the Disease and suggests the farmer with fertilizers are to be used
- To accomplish the above task you must complete the below activities and tasks;
    - Download the dataset.
    - Classify the dataset into train and test sets.
    - Add the neural network layers.
    - Load the trained images and fit the model.
    - Test the model.
    - Save the model and its dependencies.
    - Build a Web application using a flask that integrates with the model built.
